

Kenyon By Midwest Rake Intro

As with Midwest Rake Company products, Kenyon tools are also asked for by name.

For many years, **Kenyon** tools have been recognized for their quality and lasting service within the professional landscape and irrigation, discerning homescaper, agricultural, lawn and garden and contractor supply markets around the world.

When we purchased **Kenyon Tools** in 2006, our pledge to the many distributors who represent **Kenyon** products was simple and clear.

“Midwest Rake Company is committed to the continued promotion, quality enhancement, and growth of the Kenyon brand and product portfolio.” We intend to build upon the excellent reputation that **Kenyon** commands in the marketplace. We believe that the combined strength of **Kenyon** and **Midwest Rake Company** will afford both our company and our multiple distributor networks with “new product” sales opportunities and enhanced “new market” penetration potential; e.g. new customers.

SPECIAL NOTE: To our most important and demanding customers... those who use our tools... the combined force of Midwest Rake and Kenyon means more great tools you'll want to own, and will, for a very long time.
