

Blade serrations grip branch for controlled cut.

1 inch Capacity Bypass Pruner

MWR Item No.	Kenyon Item No.
41403	14-105

A versatile tool equally suitable for fine pruning. It will also fit a smaller hand.

3/4 inch Capacity Bypass Pruner

MWR Item No.	Kenyon Item No.
41401	14-100

An Anvil Pruner option is ideal for cutting growth.

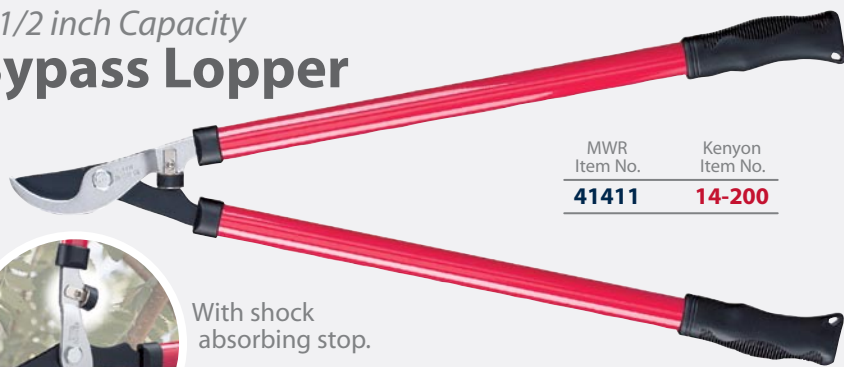

3/4 inch Capacity Anvil Pruner

MWR Item No.	Kenyon Item No.
41405	14-110

- Hardened and coated, non-gumming blades require only minimal force to produce clean cut
- Lightweight, ergonomically designed, red vinyl coated handles offer easy maneuverability and control
- Metal latch secures blades for safe storage

1-1/2 inch Capacity Bypass Lopper

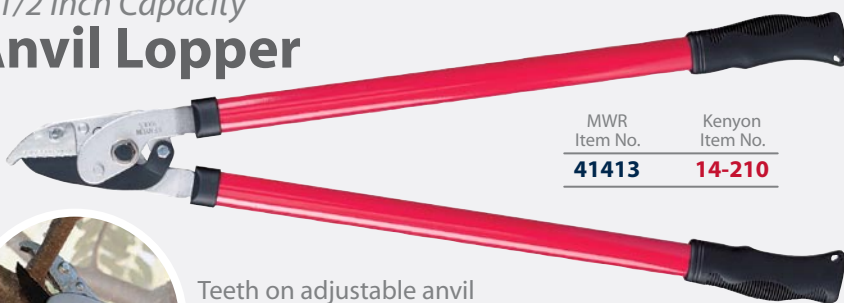

MWR Item No.	Kenyon Item No.
41411	14-200

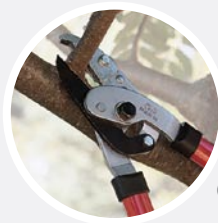

With shock absorbing stop. Produce a clean single-action cut.

1-1/2 inch Capacity Anvil Lopper

MWR Item No.	Kenyon Item No.
41413	14-210

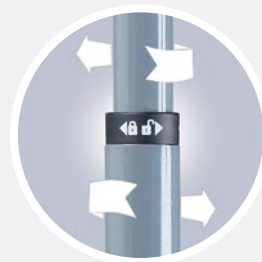

Teeth on adjustable anvil hold branch in place as blade serrations grip to produce a controlled, clean cut. Compound action offers exceptional leverage.

- Both of these big 29" loppers feature oval-shaped handles and cushioned grips to work comfortably from any angle
- Hardened and coated, non-gumming blades require only minimal force to produce clean cut
- Bright red handles make the tools easy-to-spot, hard-to-lose on the job

Telescoping Pole Pruner

- Double point saw blade efficiently cuts large limbs on forward and back stroke
- Non-gumming lopping blade is ideal for hard-to-reach branches
- Pulley and leverage system requires minimal force to produce clean, accurate cuts
- Telescoping, fiberglass pole offers lightweight strength and control
- Easy "twist 'n lock" feature adjusts pole from 4 to 8 feet without use of tools or fasteners
- With 1-1/4 inch bypass lopping blade and **BIG** 12-1/2 inch saw
