

# American Heritage

by Midwest Rake Company

★ ★ ★ ★ **A Difference that Counts** ★ ★ ★ ★

*True 100% American forged, assembled and finished striking tools of superior quality and craftsmanship. All steel, timber, and fiberglass are from domestic sources. A difference that counts... A difference we're proud of... A distinction and statement of value for you.*

★ ★ ★

## Hammers & Sledge/Mattock... unmatched strength

- Forged "tool steel" heads with striking faces, precision machined for proper radius and chamfer, then heat-treated for greater depth of hardness at Rockwell 45-55. This translates into more accurate performance, greater safety and maximum durability. Coated to deter rust. Kiln dried, American-made hickory handles with eye section further dried (10% moisture content) to avoid shrinkage and insure proper head-to-handle fit. Handles are hydraulically inserted into the head and secured with an aluminum wedge, producing a very secure mechanical bond.

## Axes... unmatched craftsmanship

- Forged "tool steel" heads, hand sharpened tapered bit edges are heat treated to Rockwell 45-60 for greater depth of hardness, edge holding, safety and durability. Coated to deter rust. Wood handles are kiln dried to avoid shrinkage and insure proper head-to-handle fit. The interior detail of the eye is also tapered, allowing for a more secure mechanical bond. Heads are hydraulically seated onto handle and secured with a serrated aluminum wedge, preventing shrinkage and providing maximum fit and hold.

## Pulaski Axe

- Forged steel heads
- Hand sharpened, single bit axe blade on one end
- Mattock blade for digging and grubbing on other end

*Heads are forged from a single piece of carbon steel for unmatched strength*

**MADE IN THE USA**

### 36" Fiberglass Handle

- Pultruded structural fiberglass core with injection molded jacket
- Jacket is engineered polymer, extremely tough, non-conductive and non-corrosive

### 36" Hickory Handle

- Double bit American hickory
- Eye section is dried to below 10% moisture content to minimize shrinkage and help prevent loosening

MWR Item No.	Description	Handle Length in.
<b>41350</b>	Pulaski Axe - fiberglass handle	36

MWR Item No.	Description	Handle Length in.
<b>41349</b>	Pulaski Axe - wood handle	36
