Roller Frames & End Caps

Exclusive Midwest Rake Heavy-Duty Aluminum Roller Cover Frames

The heavy-duty fixed aluminum frame is the most durable roller frame on the market. It is available in widths of 9", 18", 24" and 36". It can be used with any of the roller covers listed below. The roller frame can be ordered with a threaded handle adapter or with a fixed handle assembly (66" powder-coated aluminum handle and gusset bracing). These frames require special 3/8" post hole end caps to adapt the frame to any 1-1/2" roller.

9" - 18" Adjustable Roller Cover Frame

The 9"-18" adjustable roller frame has a rigid and durable steel frame with a threaded handle adapter, yet weighs less than a pound. **This is the best adjustable frame available.** Any roller used with this frame requires standard 1/4" end caps.

Roller Covers

Pro-Grade

Our Pro-Grade roller covers are made of shed and solvent resistant fabrics. They are available in nap lengths of 1/4", 3/8", 1/2" and 3/4". **(We have access to a full range of roller covers from 9" to 36" in width. Custom roller widths and nap lengths are available - call us with your needs.)** The Pro-Grade rollers do not come with end caps - please see end caps above.

The Carpet Nap roller cover is for the application of adhesives and coatings. The Loop Roller covers are for applying epoxy coatings and sealing materials. The Carpet Nap and Looped Polymer roller covers are available in widths of 9" and 18". **The 9" rollers do not come with end caps. See above for end caps. The 18" rollers come with end caps.**

Application Brushes

The **Heavy-Duty Aluminum Blacktop Sealing Brush** features a solid aluminum frame and a replaceable 36" brush. The flexible bristles are made of durable polypropylene and are 2-1/2" long. The angle of the bristles can be set within a 60° range. It is available with a 66" powder-coated aluminum handle or with a threaded handle adapter.

The **Blacktop Sealing Brush** comes in either a 24" or 36" width. The durable polypropylene bristles are securely fastened to a solid hardwood block. **This tool is used with a threaded tip handle (see page 66)** and can be used with the economy wrap-around braces for greater strength.

The **Edging Brush** has 2-1/2" white tampico bristles which enable it to hold more material than synthetic brushes. The bristles are securely fastened in a 7" solid hardwood block. **Threaded tip handle options are on page 66.**
