

## CAM® Gauge Rake CAM® Sets

We use a "radial" edge CAM® design which maintains uniform coating thickness, even at varying handle angles and lengths.

**CAM® Gauge Rake Frames and CAM® Sets are sold separately**

**Larger CAM® Sets:**

**5/8" CAM® Set  
57090 (size 10)

## "Sled" Style Gauge Rakes

These **self-adjusting** gauge rakes have been used for many years. Although not as precise as our other gauge rakes shown, they are **value priced**, will allow you to achieve a reasonably level depth when installing more cementitious materials, and **do allow you to more easily move over rougher surfaces.** **Styles and colors may vary, but the "sled-style" self-adjusting features of these gauge rakes will be "standard" characteristics of anything available in this category.** **...and our handle adapter is "threaded".**

**0" to 2" Depth**
