*Threaded Handle Adapter ****Red Rubber blades are flat on the reverse side**

Hand-Held Squeegees

Hand-Held Squeegee **EXCLUSIVE**

You can go back again and again to the hardware store or home center to buy window squeegees, or you can just change the 8" wide blade in this quality built, hand-held squeegee. It is used to fill depressions and cracks in a floor prior to the application of any protective coating product. You can also use it to spread any material, including slurries and highly viscous and cementitious mixes. **It comes with a choice of a 3" flexible rounded edge neoprene blade, or a 1-1/2" more rigid square edge neoprene blade.** The blade is clamped in a durable 11" long x 8" wide aluminum frame, not bolted through, making it easy to replace. The handle is a 6" non-slip vinyl grip over an aluminum core.

78708

Want a different blade? Well, buy any option of our 16" squeegee blades on page 7, cut it in half...and you've got a new blade and a spare.

Window Squeegee

OK, for those of you who are still not convinced or just plain lack any sense of adventure...here it is...a 10" hand-held window squeegee. Blade is replaceable.

Tapered Handle Available - See page 18

Flexible Radius Squeegee/Trowel

This highly versatile, **solvent-resistant rubber hand tool** (may be used with a handle, see page 18) with flexible wings is **ideal for the application of higher viscosity waterproofing, floor coating and sealing materials and along floor edges, for crack and patch filling on floors, and for the creation of a rounded radius along straight and radial edges when applying many different cementitious materials such as epoxy patching mortar on floors.** The flexible wings conform to any corner or floor edge, providing for the smooth application of material. This is a flexible tool for coating and sealing many of the most difficult areas that need to be well sealed. **You can't limit this tool to a single use;** it has cross-over coating applications in all of the markets we serve, from floor coating to waterproofing, roofing, etc. **This is truly one of those, "I gotta try it" tools.** The wing width is 6-1/2" and the length is 9-1/2". A 1" diameter handle may be used with this tool.
