

Notched Application Squeegees...*the right tool for primers*

Ideal for use with primer and other self-leveling materials, these quality clamp-style squeegees allow for easy blade exchange and are available with threaded handle adapters or "fixed" powder-coated aluminum handles. The most durable on the market, these quality frames can be used over and over again, requiring only the purchase of replacement blades. Many additional widths and notch sizes are available. The product shown has a 24" wide head and a solvent-resistant "reversible" red rubber blade - flat (no notch) on one side, 1/8" on the other side. A great value.

24" with Threaded Handle Adapter - 78129
Replacement Blade - 79730

Flexible Blade Smoother

This flexible 24" x 5" rounded corner steel blade is bent and angled to maximize blade contact with a range of surface coating materials. This smoothing tool can also serve as a spreading tool and even a surface preparation tool. It is most often used when troweling and/or smoothing overlay/underlay material (toppings) of a more cementitious composition prior to surface treatment. The blade is contained in a durable aluminum frame with our superior gusset bracing system. This tool is available with a threaded handle adapter or with a 66" powder-coated aluminum handle. Square cornered blades are also available.

MWR Item No.	Description	Blade Style
78906	With Threaded Handle Adapter	Round
78907	With 66" Powder-Coated Aluminum Handle	Round
78902	With Threaded Handle Adapter	Square
78903	With 66" Powder-Coated Aluminum Handle	Square

A must... Smoother/Spreader

This tool is lightweight, yet durable. It features a 22" frame with a 23-1/2" x 2" heat-treated steel blade, fan-shaped for next to wall coverage, and a reversible "threaded" handle adapter assembly allowing for use as a smoother or spreader. Spread material with the blade in a vertical position (see below). Flip the tool over and smooth the surface as shown. This is a "core" tool...

See handle options on page 18 Use #SP20215 (wood) or aluminum powder-coated handle.

Long handled "troweling" action, too...

Topping and Underlayment "Super Squeegee"

A 24" low-angle/clamp style frame with a durable gusset bracing system is combined with a rounded edge, 3" exposed neoprene rubber blade. The result is a tool that effectively eliminates the need for troweling. A true spreading and smoothing squeegee allowing the contractor opportunity to save time and money when working with "toppings", underlayments and "high-mil" self-leveling materials. The contractor-friendly head to handle to surface angle has made this a very effective and popular tool.

3" Neoprene Rubber Blade

MWR Item No.	Description	Blade Size in.
78601	Squeegee with Threaded Handle Adapter	24
78602	Squeegee with 66" Powder-Coated Aluminum Handle	24
SP50071	Replacement Blade	24
