

Why Midwest Rake Company?

- ✓ Midwest Rake Company has no minimum purchase requirements. If you need one tool, you can buy one tool...and we welcome your business. We do offer pricing discounts, depending on the dollar amount of every purchase order.
- ✓ We also drop-ship products around the world. We help you save money by doing so. Although the unit cost of a product may be a bit higher, we are equipped and experienced in providing not only technical support, but also next day delivery when the job requires it; for in fact, we have two customers for most every sale...you and your customer.
- ✓ We offer many "100% Indiana Made" tools...a difference we're proud of...an advantage to you. Sooner, not later, the "origin of products" will become a major control issue..."Where is this made?"...a question that will be more frequently asked. We do make many of our core products right here in Warsaw, Indiana. By doing so, we better control the manufacturing process and the quality outcome of many products we sell you. Making and building our own products also affords us greater control over supply and delivery schedules.
- ✓ Midwest Rake Company has a long history of creativity and innovation; from the superior bracing systems we build into our tools, the special recipe we require in the aluminum we use, and the many unique and exclusive tools we now offer. There is always a lot of pressure in our "new product" pipeline...
- ✓ The broad range of markets we serve allows our distributors to penetrate new markets; thereby capturing new sales and adding to their bottom line. Many of our distributor partners tell us that it's not just our quality that counts; they like getting such a great range of products from ONE SOURCE. Our diversity can be your gain...
- ✓ We will always strive to honor God in our pursuit of business success.

...and there's a whole lot more...

and see our **Master Catalog** for a complete overview of our entire line of quality products.

*One Company...
serving many markets,
when quality counts.*
